TOPCRET

NOTHING SO THIN IS SO HARD

MICROCEMENT 

TOPCRET

Topcret is a leader in the production and application of stylish cement-based micro-coverings for floors, walls and furniture.

Topcret's BAXAB[®] , the toughest continuous floor

Available in a wide colour palette, without joints and with its trowel handmade finishing, BAXAB[®] achieves surfaces of great quality and beauty. It is totally impermeable, so it can be applied on kitchens, bathrooms and any wet areas.

With only 3mm thick and its fast application time, it is ideal for remodelling works since it does not require removing existing floors or changing openings nor bases. Open to foot transit after a few hours of application. It is totally waterproof, so it can be applied on kitchens, bathrooms and any wet area. Highly resistant to cracks, stains and scratches. Nothing so thin is so hard.

THE NEW TECHNOLOGY BEHIND BAXAB®

The new technology developed by Topcret includes the application of two layers of Microcement base plus mesh over the existing surface. Followed by two finishing layers of BCED, which is 10 times stronger than that of conventional micro-cements. It is of extreme hardness and is highly resistant to pressure and breaks, creating a solid, stable and very durable continuous seamless surface. The final protection finishing, the exclusive CRED Shield is an innovative material that is highly resistant to scratches, stains and burns. It creates a sophisticated surface with a durable, decorative finish.

MAIN FEATURES:

3mm thick

Manually (artisanal installation process) applied for a unique finish

Seamless

Non toxic

Scratch-resistant

Waterproof

Stylish & contemporary look

Commercial and domestic applications

Open to foot traffic 24hours after installation

Suitable for Floor, walls and even furnitures coating for both indoor and outdoor

EVEN IN YOUR SHOWERS

All Topcret products are waterproof, which makes them suitable for wet areas, such as kitchens, bathrooms, and even shower areas.

Topcret has also developed a surface treatment call T/Grip, especially designed for wet areas; through the use of micro-articles, it ensures greater resistance to slipping where it is applied. It can be applied on top of any Topcret products for maximum grip, minimizing slipping and sliding to create a much safer surface.

COBRE (COPPER)

PERLA (PEARL)

PLATA (SILVER)

BLANCO ROTO (OFF WHITE)

ORO (GOLD)

ACERO (STEEL GREY)

NEGRO FUMO (SMOKY BLACK)

HABANO (TAN)

LABORATORY TESTS AND CERTIFICATIONS

Topcret has tested the Baxab® technology under exhaustive external technologic certifications to determine the extent to which this product is highly resistant.

Resistance to adherence, UNE-EN 13892-8:2003	>3,3N/mm ²
Surface Hardness, UNE-EN 13892-6:2003	120N/mm ²
Transmission index of liquid water (permeability), UNE-EN 1062-3:2008	0,01kg/m ² h ^{0,5}
Determination of flex properties, UNE-EN ISO 178:2003	1,3kN/mm ²
Impact resistance, UNE-EN ISO 6272:2012	>14,7 Nm
Drop height where the first fissures are observed	A 1500 mm
Diameter produced at this height:	9,5 mm
Resistance to BCA wear, UNE-EN 13892-2: 2003	30 µm

Determination of chemical resistance, UNE-EN 13529: 2003

No defects up to: 7 days for chlorine; 1 day for bleach, olive oil, alcohol, viakal and vinegar; 6 hours for lemon juice.

ZERO COST WARRANTY

Because of the confidence we have in our products and human resources, we can offer this warranty which guarantees the repair or replacement of our installations cause by defective materials for **a period of three years**.

This guarantee is subject to the explicit conditions stated in our terms & condition.

Other terms and conditions apply
